

The Elan

An impressive new model has joined Burley's range of flueless gas fires. The stylish Elan is a contemporary "hole in the wall" fire with a powerful 4.5kW output.

Whilst conventional gas fires lose much of their heat up the chimney, the clean-burning Elan incorporates catalytic technology and doesn't require a chimney, flue or electricity. This makes the fire 100% efficient - all the heat produced by the Elan is used to warm the room.

The Elan boasts a realistic log bed and dramatic flame picture and is available with a choice of chrome or black trim. A smaller two-tone chrome trim is also available. Remote control is supplied as standard.
